Mission statement:
Ensuring you find a parking space, hassle free

The problem

Number of registered private vehicles have been constantly increasing [1]
Parking Spaces have not grown at the same rate [2]

Growth rate of vehicles in Delhi during 2017-18: 5.81%
The highest growth: 'other passenger vehicles': 27.56%

Net effect: finding a parking space has become tougher

[Delhi Economic Survey: 2018]

parkMyCar

The solution

Introduction of an interface to connect parking provider to a parking seeker.

Real time display of available parking spaces near you.

Book a space instantly or reserve a spot in advance.

___

Why do we need it?

**We can always search "Car park near me".
So why use parkMyCar?**

*parkMyCar provides you with a real time
availability of parking spaces around you. It
improves upon the search by guiding you to an
exact empty parking space, rather than a full
parking lot.*

*Also our "Reserve for Later" feature enables you
to reserve a parking space in advance albeit at a
nominal additional cost.*

How it works (for parking seeker)

Step 1	Step 2	Step 3
Send a Booking request.	Choose the booking type: Instant / Reserve for Later	Provide your Details, so that we can verify and confirm your booking.

For the parking lot owners: process

Any registered parking lot owner can register with our service. Register, locate yourself, add available spaces and you are good to go!

Register

Locate yourself

Add available spaces

For the parking lot owners:
Benefits

Great demand

Given the well documented parking problems (ref.), there is bound to be a demand for this service

+

Easy to use Interface

Our minimalistic UI ensures ease of use for all.

→

Greater Profits for all

Greater demand and a simplified service provider.

For Owners of Free Space

If you own a private vehicle, you can also list your private parking space on our platform, and earn while your your spot isn't in use.

Have a private parking space lying empty?

Most private vehicle owners have their personal parking space that lies unused whenever they go out

Register

In case you have a space lying free for certain hours, register on parkMyCar

Locate Yourself

Help us locate you, by dropping a pin or enter your address and let mapMyIndia's Geocode API find you

Enlist your space as available, whenever you're out

Whenever your space is lying empty, enlist your "Parking Lot" as open, else keep it closed

Earn from a previously unused space

You have now monetized your previously free land

The technology used: mapMyIndia + Microsoft Azure
